

Caleb Phillips

SOFTWARE ENGINEER

SUMMARY

Creative and detail-oriented freelance web developer with a proven track record of creating and implementing successful front and back end web applications. Looking to bring my skill set to a company focused on building impactful products.

WORK EXPERIENCE

Software Engineer at 100Devs, New York, NY —

JANUARY 2022 – PRESENT

- Built modern and responsive web applications in collaboration with a team of developers while implementing best practices
- Created semantically structured full stack web applications
- Managed projects by applying agile project management methodologies such as scrum

Recent Projects:

RxMate (Full Stack Web App) – Users can log in to their profile and create a list of medications they are currently taking. For each medication the user can input the dosage and frequency, as well as set up reminders to take them.

FlickList (Full Stack Web App) – An open-source movie recommendation web application. Users can create accounts, enter recommended movies with its associated information populated by data from API calls, filter by genre, sort alphabetically or by date, mark movies as seen, as well as delete them.

Other Projects: Bartender Pretender, Daily Dose of the Cosmos, Recipe Finder and more.

Freelance Web Developer, New York, NY —

APRIL 2021 – PRESENT

- Built full stack web applications and static websites using industry standard languages and technologies
- Collaborated with clients to define project requirements and deliverables, as well as managed project timelines and budgets effectively
- Utilized responsive design techniques to ensure websites and applications were user-friendly on multiple devices and browsers

Registered Nurse, New York, NY —

OCTOBER 2019 – APRIL 2021

Maintained coordination of care among the interdisciplinary healthcare team and included teaching, counseling, rounding, delegation, and implementation of care.

U.S. Air Force – Tactical Air Control Party, Multiple Locations —

JULY 2011 – SEPTEMBER 2017

Conducted and supervised training of Tactical Air Control Party personnel in basic electronics and antenna theory, internet protocol configuration, network operating principles, analog/digital communications equipment interoperability, encryption practices for secure communications, data transfer techniques, and broadband satellite operations.
